

SPRINT 3 TEST CASE

Sprint 3

US24 — As a therapist, I want to view journal entries and mood trends of users who have enabled sharing so that I can understand their emotional patterns.

Acceptance criteria: Therapist can select a user from their list; therapist can view journal entries in chronological order and mood trends; data is shown only if sharing is ON; if sharing is OFF show a friendly message; therapist cannot edit or delete any data.

TC ID	Scenario	Type	Status	Description	Input / Payload	Expected Result	Notes
TC_US24_01	Valid flow	Integration	PASS	Linked therapist views patient journal entries with sharing enabled	GET /api/therapist/patients/:patientId/journal with therapist auth + linked patient	HTTP 200; journal entries returned in chronological order	Happy path journal access
TC_US24_02	Valid flow	Integration	PASS	Linked therapist views patient mood trend data with sharing enabled	GET /api/therapist/patients/:patientId/mood with therapist auth + linked patient	HTTP 200; mood trend points returned for charting	Happy path mood access
TC_US24_03	Invalid input	Integration	PASS	Therapist requests patient data when sharing is disabled	Therapist auth + linked patient with sharing OFF	HTTP 403; friendly not-shared response returned	Sharing-off enforcement
TC_US24_04	Invalid input	Integration	PASS	Unlinked therapist attempts to view patient data	Therapist auth + unrelated patient ID	HTTP 403; access denied	Link validation
TC_US24_05	System response	Integration	PASS	Therapist attempts edit or delete action on patient data	Mutating request from therapist role on patient data endpoint	HTTP 403; write action rejected	Read-only protection
Totals			5	0	0
